## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-52, drawn to a composition comprising Vitamin C, Vitamin E, chromium, selenium, zinc and B complex classified in class 514, subclasses 458, 474 and class 424, subclasses 641, 655, for example.
- II. Claims 53-166, drawn to a method for supplementing nutritional deficiencies in a patient comprising administering a composition comprising Vitamin C, Vitamin E, chromium, selenium, zinc and B complex, classified in class 514, subclasses 458, 474 and class 424, subclasses 641, 655, for example.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case nutritional deficiencies in a patient can be supplemented by using protein and/or carbohydrate bars or shakes.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1617

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

***Specie Election***

Claims 1-116 are generic to a plurality of disclosed patentably distinct species comprising disease states, i.e., kidney diseases, anorexia, hypercholesterolemia.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, **a single disease**, even though this requirement is traversed. The treatment of each of the disorders encompassed by the classification disease states or even kidney diseases represents a separate field of medical technology having a separate field of search. For example, hypercholesterolemia is treated with HMG CoA reductase inhibitors, whereas anorexia is not routinely treated with HMG CoA reductase inhibitors. Similarly kidney infection (nephritis) is routinely treated employing antibiotics, whereas hypercholesterolemia is not routinely treated with antibiotics. The search for the treatment of all diseases encompassed by the classification disease states or kidney diseases is therefore an undue burden on the office. Note that the search is not limited to the patent files.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 1617

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
